Note: (1) Data presented are based on 30% to 35% sample data of VDP community and household survey. Sample of villages are selected to represent the demographic, topographic and agroecologic characteristics of the whole rural area of township. In exceptional cases, where a township has few villages, the sample size is as high as 50%.

(2) Sampling criteria and list of sample villages are provided "Here".

(3) This table presents data collected in 2016. The population and demographic data may vary with the 2014 population census data because of the dynamics of population movement at the local, village
